

Temple Management System – Activities & Software Requirements- Phase1

1. Pooja Management

Purpose

Manage devotee registrations, pooja bookings, ticket generation, pooja execution, and history for all categories of poojas.

Process Flows

1.1 Daily Pooja

1. Devotee registers at the counter.
 2. Counter staff books the pooja and issues a ticket.
 3. A carbon copy of the ticket is retained at the counter.
 4. Devotee presents the ticket to the Poojari.
 5. Poojari verifies the ticket and performs the pooja.
 6. The ticket is collected and disposed after completion.
-

1.2 Monthly Pooja

1. Devotee registers and books the pooja.
 2. Counter issues a ticket.
 3. One carbon copy is retained at the counter.
 4. Another copy is provided to the Poojari.
 5. Poojari records the booking in the pooja register/diary.
 6. Devotee presents the ticket daily for the specified period (normally 30 days).
 7. Poojari verifies the booking against the register before performing the pooja.
 8. After completion of the monthly schedule, the ticket is collected and disposed.
-

1.3 Life Long Pooja

1. Devotee registers at the counter.
2. Counter issues the ticket and keeps a carbon copy.
3. Devotee presents the ticket to the Poojari.
4. Poojari verifies the ticket and records the devotee details in the lifelong pooja register.
5. Original ticket is returned to the devotee.

6. Pooja is performed according to the lifelong schedule.

1.4 Special Pooja

1. Devotee registers and books the pooja.
2. Counter issues the ticket.
3. Counter retains one carbon copy.
4. Another copy is sent to the Poojari.
5. Poojari records the booking.
6. Devotee presents the ticket on the scheduled day.
7. Poojari verifies the booking and performs the pooja.
8. Ticket is collected after completion.
